Provides Quick & Easy Connections

Connects PEX, CPVC, copper and other copper tube size products.

Facts on Genova UNIVERSAL
Hot & Cold Water Supply Fittings

Universal Fittings are made of Chlorinated Polyvinyl Chloride (CPVC) and are approved for use within buildings for potable hot and cold water distribution. Whether it’s an installation of a new hot water heater or the replacement of a faucet, our Universal Fitting System can be used in conjunction with your choice of copper tube size (CTS) water supply tubing. Now anyone can easily complete all plumbing repairs and new installations in residential, marine, and RV applications quickly, easily and inexpensively.

CPVC products are made of superior energy saving thermoplastic materials which are easy to handle and outperform all existing metal water systems. CPVC is impervious to corrosion and mineral buildup within the pipe, resulting in a lifetime of worry-free performance.

Genova Universal fittings are manufactured with strict quality control standards. They meet ASTM D3309 and are designed to withstand continuous operating pressures of 200 psi at 73°F or 100 psi at 180°F.

Before beginning any plumbing project check your local plumbing codes for approvals.

Universal Fitting Installation
* Cut tubing square to length, remove any burrs
* Mark tubing 1¼” from end
* Lubricate with liquid soap only
* Make sure all component parts are correctly assembled-DON’T INSTALL IF ANY COMPONENT PARTS ARE MISSING
* Push tubing fully into the nut past the “O-Ring” seal, to seated position
* Hand Tighten only
* The mark should align with the outside edge of the fitting

Note the order in which each of the component parts are installed. Be sure all parts are present and in this order before installing. Avoid installation where product will be exposed to excessive sunlight.

Caution
Metal gripper ring edges are sharp, handle with care.

Genova Wrote the Book on Plastic Plumbing

This fully illustrated text makes you the plumbing expert. See how easy and economical it is to plumb your whole house or addition, install a sump pump and even build a sewer-septic system utilizing today’s modern plastic piping materials.

The “Do-It-Yourself” book is the most comprehensive book yet on modern plumbing installation and deserves a prominent place in your “how-to” library.

If not available in your dealer’s how-to-library, please clip out this order form and send for your guide into the world of easy-to-do plumbing.
